EDUCATION

Amrita Vishwa Vidyapeetham **Oct 2022 – Aug 2026**
B.Tech, Computer Science and Engineering, AI - ***GPA - 7.69*** *Chennai, Tamil Nadu*

PROJECTS

Support Ticket Triage and Assignment System | React,Python, FastAPI,SQLite **Aug 2026**
- Built a robust ticket-triage data model separating original customer data, AI suggestions, human-edited active fields, and append-only audit/activity records.
- Implemented structured AI integration with strict JSON validation, failure handling, retry support, human-review protection, and extensibility for roles and production migrations

Personalized Academic Chatbot | Python, FastAPI,Openai **Mar 2026**
- built a personalized academic chatbot that combines conversational AI with user-specific context from interactions, learning preferences, interests, communication style, and resume insights.
- The system uses a shared database and personalization module to continuously generate user profiles and inject personalized context into LLM prompts, enabling adaptive academic guidance, college recommendations, career advice, and responses tailored to each user's needs.

AI Travel Planner | serpapi, BeautifulSoup, Groq **Feb 2025**
- Using the Groq API, the project develops a multi-step prompt system for creating individualized travel itineraries.
- Using SerpAPI, the system gathers pertinent information in real time to provide search results for destination photos, top hotels, attractions, and restaurants.

EXPERIENCE

4SightAI **Sep 2026 - Present**
Role: GenAI Associate Intern
- Developing a conversational voicebot for speech-based form filling using Web Speech API, FastAPI, WebSockets, and MongoDB, with LLM-based extraction of user responses into structured form fields.

Bayes Labs **Oct 2024 - Dec 2024**
Role: Research Intern
- Developed AI-powered Multi-Agent Systems to automate customer query resolution and enhance decision-making workflows.
- Built Retrieval-Augmented Generation (RAG) pipelines for efficient information retrieval and real-time problem-solving in diverse applications.

Krip.ai **May 2025 - Aug 2025**
Role: ML Intern
- Developed a Tech Stack Recommender that analyzed project requirements and recommended suitable programming languages, frameworks, databases, and tools based on project needs.
- Built recommendation logic to improve the relevance of technology recommendations for different project requirements.

Alumna.ai **Aug 2025 - Mar 2026**
Role: AI/ML Intern
- Developed a conversational AI chatbot for personalized academic and career guidance, leveraging user context and interaction history to generate relevant responses.
- Built a personalization module that analyzed user behavior, communication style, interests, learning preferences, and resume insights to dynamically adapt chatbot responses and recommendations.

TECHNICAL SKILLS

Languages: Python, Java, C, Javascript
Databases: MySQL, MONGODB
Frameworks: Scikit-learn, NumPy, Pandas, React, LangChain, Matplotlib
Tools: Claude Code, GPT, Open Code, Visual Code, Git, Cursor, Google Colab

ACHIEVEMENTS

MLXLR-8 Hackathon 2nd Runner-up

Winner in the Data Visualization Competition at TECHNOVANZA 2025, a prestigious national-level technical symposium
